

"KENYA DISCOVERY"

Loisaba Conservancy – Samburu Reserve – Ol Pejeta Conservancy 7 days /6 nights

Loisaba is a 57,000-acre wildlife conservancy and working ranch located in Northern Laikipia, Kenya, East Africa. The two permanent rivers and abundant permanent springs make Loisaba attractive to wildlife throughout the year.

The Nature Conservancy and The Loisaba Community Trust continue to ensure Loisaba remains a catalyst for community development, a hub for wildlife research, and a world-class ecotourism destination offering unique opportunities for guests to become part of the Loisaba story both during their visit and for years to come.

corridors.

Keeping this land, and a 15-million-acre landscape of nearby community lands intact and functioning for wildlife, livestock, and northern Kenya's pastoralist people is being achieved largely through creating community conservancies boarding Loisaba.

"Kenya Discovery"

LOISABA CONSERVANCY

Loisaba is also part of a larger story that extends well beyond its borders. It sits on the western edge of one of Kenya's most important elephant movement

- H. 08.30 Departure from Wilson Airport to Loisaba Airstrip
- H. 10.00 After landing, transfer to Loisaba Tented Camp

Accommodation and Lunch

- H. 16.00 Game drive until sunset
- H. 18.00 Sundowners (aperitif in the savannah at sunset)
- H. 19.30 Back to the Camp
- H. 20.00 Dinner and overnight

wild and its accommodation is comfortable beyond measure. You can star-gaze and elephant-watch in Loisaba Conservancy, a private reserve that embraces an elephant migration 'corridor'...

Perched on the edge of an escarpment, Loisaba Tented Camp is designed to make the most of the unobstructed views of the mottled Laikipia landscape up to Mount Kenya. All accommodations and main areas enjoy a breathtaking vantage point over a wide panorama. In addition to night game drives, you can do different activities, horseback riding, camel-trekking, guided bush walks, fishing, mountain biking, cultural visits to Samburu villages and visits to anti-poaching dogs.

Loisaba Conservancy, is a story of conservation success. The elephant house, a healthy population of lions, the rare wild dog and the abundance of other species, Loisaba is an excellent example of successful collaboration between conservation, community, livestock and tourism.

Loisaba Conservancy is extraordinarily beautiful, its abundant wildlife is truly

- H. 06.30 Coffee before the Game drive
- H. 07.00 Early Game drive
- H. 08.00 Bush breakfast
- H. 12.00 Back to the Camp Lunch
- H. 16.00 Game drive until sunset

(Possibility of extra activities not included)

- H. 18.30 Back to the Camp
- H. 20.00 Dinner and overnight

H. 06.00 Breakfast and departure for Samburu National Reserve

H. 13.00 Arrival to the Lodge / Camp – Accommodation and Lunch

The Samburu Reserve was one of the areas where environmentalists and spouses George and Joy Adamson adopted and lived with the Elsa lioness. Their history was later made famous by the autobiographical novel "Born Free", which became a best-seller and was then followed by the film of the same name.

- H. 16.00 Game drive until sunset
- H. 18.30 Back to the Lodge / Camp
- H. 20.00 Dinner and overnight

Samburu National Reserve is situated at the south-eastern corner of Samburu District in the Rift Valley Province of Kenya. It is bordered to the south by Ewaso Nyiro River, which separates it from the Buffalo Springs National Reserve.

The reserve is reach in wildlife with fame for abundance in rare northern specialist species such as the Grevy Zebra, Somali Ostrich, Reticulated Giraffe, Gerenuk and the Beisa Oryx. The reserve is also popular with a minimum of 900 elephants. Large predators such as the Lion, Leopard and Cheetah are an important attraction (Kamunyak the Miracle Lioness that adapted the baby Oryx is a resident in the reserve).

Wild dog sightings are also a common attraction to this unique protected area. Birdlife is abundant with over 450 species recorded. Lesser Kestrel and the Taita Falcon are species of global conservation concern and they both utilize the reserve.

Five species categorized as vulnerable have recorded in the reserve. These are African Darter, Great Egret, White-headed Vulture, Martial Eagle and the Yellow-billed Ox-pecker. Critically endangered species under CITIES – Pancake tortoise (malacochersus tornieri) is found in the reserve.

SAMBURU NATIONAL RESERVE

GREVY'S ZEBRA

Grevy's zebra was the first of the zebra species to evolve after asses. Taller, narrow stripes, a white belly, black dorsal stripe, large rounded ears and a brown muzzle the Grevy's zebra is easily distinguished from the more common plains zebra. These two species overlap in the southern range of Grevy's zebra and the northern range of plains zebra.

Grevy's zebra occupies the niche between the water-dependent plains zebra and the arid-adapted wild ass, living in arid and semi-arid habitat comprised of grass and shrubland with permanent water available. Predominantly grazers, Grevy's zebras live on forbs and grasses but during extremely dry periods they also browse.

Grevy's zebra can go without water for up to 5 days however if lactating, the females must drink at least every other day in order to maintain milk production. With land degradation worsening each year, the distance between available grazing and water increases, meaning that Grevy's zebra mums have to make long and more frequent journeys, resulting in high foal mortality, which is one of the major threats to the survival of the species.

RETICULATED GIRAFFE

Giraffe are icons of Africa and particularly Reticulated giraffe are often considered one of the most stunning.

Giraffe are integral to their ecosystems, opening up habitat for other wildlife, spurring growth of new forage, and dispersing seeds. Current estimates are that over the past 20 years the reticulated giraffe population has declined by over 70%, from 36,000 to less than 9,000 today. It is thought the main drivers behind the decline are habitat loss and fragmentation, land degradation, and poaching.

The social structure of giraffes is very fluid. Herd composition changes constantly, regardless of sex or age, as individuals leave and rejoin groups. Males live a mostly solitary life, though some form bachelor herds.

Giraffes are active day and night. In the early morning and evenings, they spend their time feeding and walking; during the heat of the day, they rest and ruminate. Giraffes are not territorial, though they do have home ranges where they spend most of their time. Male giraffes engage in a behavior called necking, where they use their heavy skulls to bash into one another's sides.

- H. 06.30 Breakfast
- H. 07.00 Game drive in Samburu Reserve
- H. 12.00 Back to the Lodge / Camp Lunch
- H. 16.00 Game drive until sunset
- H. 18.30 Back to the Lodge / Camp
- H. 20.00 Dinner and overnight

- H. 06.30 Breakfast
- H. 07.00 Game drive and departure in direction of OI Pejeta
- H. 12.00 Arrival at the Lodge / Camp Accommodation and Lunch

The Chimpanzee Sanctuary aims to provide refuge for orphaned chimpanzees for life. They are not natives in Kenya, but when a rescue Center in Burundi had to be closed due to the civil war infection in 1993 - OI Pejeta opened its doors. All members of the "Big Five" are located within the Conservancy.

- H. 16.00 Game drive until sunset
- H. 18.30 Back to the Lodge / Camp
- H. 20.00 Dinner and overnight

From a working cattle ranch in colonial Kenya, to a trailblazer of conservation innovation - the story of OI Pejeta is as enchanting as it is inspirational.

Today, OI Pejeta is the largest black rhino sanctuary in east Africa, and home to two of the world's last remaining northern white rhino. It is the only place in Kenya to see chimpanzees, in a Sanctuary established to rehabilitate animals rescued from the black market. It has some of the highest predator densities in Kenya, and still manages a very successful livestock programme.

OI Pejeta also seeks to support the people living around its borders, to ensure wildlife conservation translates to better education, healthcare and infrastructure for the next generation of wildlife guardians.

The conservation of the natural habitat, located in Kenya's Laikipia Plateau, ensured the protection of existing rhino, elephant, and other wildlife populations in addition to captive chimpanzees living in a 300-acre sanctuary.

OL PEJETA CONSERVANCY

- H. 06.30 Breakfast
- H. 07.00 Game drive and visit the Chimpanzee Sanctuary
- H. 12.00 Back to the Lodge / Camp Lunch

Chimpanzees share 98.6% of their genetic DNA with humans. Watching the interactions and behaviour of the chimpanzees at Sweetwaters will reveal many uncanny resemblances to humans. Like us, chimpanzees are known to make use of tools – using rocks to crack tough nuts and long, thin twigs to fish for termites.

- H. 16.00 Game drive and visit to the last 2 White Northern Rhino
- H. 18.30 Back to the Lodge / Camp
- H. 20.00 Dinner and overnight

YOU ARE ON THE EQUATOR OL PEJETATY CONSERVANCY

KENYA

Latitude:0:0:0 Alt:5990FT-1826 M

- H. 07.30 Breakfast
- H. 08.00 Departure in direction of Nairobi

Lunch (on request)

If you have a beach extension there is the possibility of flying from Nairobi to Malindi.

"What you've done becomes the judge of what you're going to do, especially in other people's minds. When you're traveling, you are what you are right there and then. People don't have your past to hold against you. No yesterdays on the road."

William Least Heat Moon

Included:

- -Transfer from / to your residence
- -Safari in Jeep Land cruiser
- -Fly Nairobi Loisaba
- -Driver /Certified Professional Guide (KPSGA)
- -Italian Certified Professional Guide (KPSGA)
- -Water in the jeep during the safari
- -Entrance fees to the Reserves and Conservancy
- -Bush breakfast and Sundowners at Loisaba -Six nights in Lodge / Camp in full board excluding
- drinks
- -Laundry at Loisaba Camp
- -Drinks, excluding premium wine and spirits at Loisaba Camp

Not included:

-Tips

- -Personal insurance
- -Drinks at the Lodge / Camp
- -Tips in lodges and camps, and drivers (recommended in camps and lodges if satisfied with the service and obligatory for the driver)
- -Anything not specified in "included"

P.S. The cost of this program could change / increase prices due to the increase in entrance fees for national parks and reserves, government taxes and accommodation rates for the current year and / or changes in exchange rates.

Confirmation of this safari is subject to the availability of selected Lodge / Camps at the time of booking.

Nurali Safaris Kenya proposes "Taylor Made" safaris, in order to satisfy everyone's needs.

In simple words "we work in ecotourism".

We will accompany you personally.
